De

De Leone. Cap. LIII.

SI tot iam leones vellem figurare, quot eos eſſe in gentilitijs Virorum nobilium,& Procerum teſſeris deprehendo; equidem non æquarem modò Lucium Syllam; qui in prætura ſua Romæ, centum iubatorum pugnam dedit: ſed eum ipſum, & præterea Pompeium Magnum, qui iubatorum trecentorum, & quindecim, atque adeo Cæſarem Dictatorem, qui quadringentorum certamina edidit, ſuperarem. Neque illos extraherem, aut ex luſtris Africæ, aut ex Lybiæ ſpelæis, aut ex obſcuris theatrorum antris & caueis; verùm ex Nobilium, Magnatum, & Regum ſtemmatis, atque ex eorum glorioſis, & ſanè illuſtriſſimis monumentis.

Plinius.

Leonem videlicet Heroes plurimi, inclytique Duces, pro ſuæ fortitudinis teſsera, in omni æuo, ſuſceperunt: vtpote qui profiterentur; (quemadmodùm inſinuaui aliàs) ſe in hoſtes haud ferri aliter; quàm leonum inſtar, aduersùs imbelles feras.

Sed peculiariter hoc egerunt Dynaſtæ Prouinciarum Belgij, ſequuti Godefridum Bulleoneum, ad expeditionem ſacram. Id verò cauſæ videtur; cur pleræque iam Belgij Prouinciæ, Leonem pro inſigni ſuo retineant; variato tamen ſchemate, eius aut coloris, aut metalli.

Petrus Doultremans in vita Petri Eremitæ.

Tāta multitudine quidem ſculpere in præſentia, icones Leonum, ego maximè operoſum reor. Attamen prodibunt pulchrè: nempe ad honorem dumtaxat, non autem ad horrorem.

Cæterùm ad confirmandam ſententiam noſtram, de gentilium harum teſſerarum origine, ex priſco ornatu rei veſtiariç, conferent etiam hæ icones ferarum; quippe veſtimentis additæ, opere phrygio. Dum autem ſchema natiui coloris exuunt atque immutant; tunc enimuerò, aut ad argumentum Principum colorantur, aut proprio familiæ amiciuntur panno. Si ita non eſset, cur Leones, Pardos, Aquilas; cur Aues alias; cur Lilia, & Roſas, non ſine quadam deprauatione, ac penè dixerim naturæ iniuria, inſignibus proprijs exueremus?

Iam autem icone diſtincta repræſentabuntur, quæcumque diſcrimen faciunt, tum in ipſo Leone, qui eſt ferarum Rex, tum deinde in Aquila, quæ eſt auium Regina; & ideò licebit paucioribus poſtea proſequi alia, quæ ſpectabunt ad formas animantium reliquarum.

Tria verò argentea capita pardorum, in area ſmaragdini coloris, gerunt BVCHOLTZII in Marchia. Vt prætercam alios plures, qui eadem capita, cum diſſimili tamen ſchemate, efferunt in teſſeris maiorum ſuorum. *VVappenbuch, ſeu liber teſſerar. Gentilitiar. Imperij, ac totius Germ.*
